

Hospital tech 2011

Ahmadabad 10th Oct 2011, Vaso Meditech Pvt Ltd are the sole distributors for EEC[®] and SphygmoCor[®] in India, participated in Hospital tech 2011. They are also into distribution of Holter and patient monitoring devices. Confederation of Indian Industry (CII) organized 'Hospital Tech 2011' – An international exhibition for medical equipment & products and healthcare infrastructure on 8th & 9th October 2011 at Gujarat University Exhibition Hall at Ahmedabad. The two-day event was held in association with Government of Gujarat.

Vaso Meditech along with their other products presented a product called SphygmoCor[®], the latest addition to their product range. This product has an edge, this is the only validated and certified device that measures Central Blood Pressure, that too non-invasively. Apart from Central Blood Pressure it also finds the arterial stiffness, your chances of a renal failure or cardio vascular risk. The amazing fact is that when cross checked with the invasive measurement, it was just the same as the one measured invasively by inserting a catheter. Vaso Meditech is the sole distributor for SphygmoCor[®] in India.

Mr. Rahul Saridena, Territory Sales Manager, Vaso Meditech Pvt Ltd, was present at the Vaso Meditech stall with his team. He was kept completely occupied by the cardiologist and surgeons visiting the stall. He and his team organized puzzle completion and distributed prizes for the winner.
